### De Watertoets

Welkom op de website voor de digitale watertoets.

Het doel van de watertoets is waarborgen dat waterhuishoudkundige doelstellingen expliciet en op evenwichtige wijze beschouwd worden genomen bij alle waterhuishoudkundig relevante ruimtelijke plannen en besluiten van de provincies en gemeenten.

Ruimtelijke plannen moeten voorzien zijn van een waterparagraaf. Hiervoor moet het proces van de watertoets doorlopen, het waterschap krijgt er in een plan voldoende rekening in gehouden met de waterhuishouding en geeft een wateradvies.

Voor ruimtelijke plannen is de website [www.digitalewatertoets.nl](#) ontwikkeld.

Als het plan beperkt is in omvang en voldoet aan het voorkeursbeleid van het waterschap, kan het een aanvullende aanmerking voor de korte procedure en wordt een positief wateradvies afgegeven.

Afhankelijk van de antwoorden die u invult kunt u direct zien welke procedure u moet volgen.

- Geen belang: Functiewijziging zonder relevante waterspacia
- Korte procedure: Klein plan met weinig relevante waterspacia
- Normale procedure: Groot plan met meerdere relevante waterspacia

Moet u voor uw plan in overleg met het waterschap? Het waterschap kan u advies geven voor handreikingen en voorbeelden die u kan helpen bij het opstellen van uw plan.

Let op! Nadat u uw antwoorden hebt ingevoerd op de website, wordt het systeem automatisch afgesloten. U kunt uw gegevens tussentijdens het proces opslaan.

Van 10 september 2018 tot 1 oktober 2018 is de watertoets gratis te bepalen.

Volgende
